

Front View C and D Moon Cut-Out Layout

Front View C - without Planking

Front View D - without Planking

Frames deliberately asymmetrical per designer specification

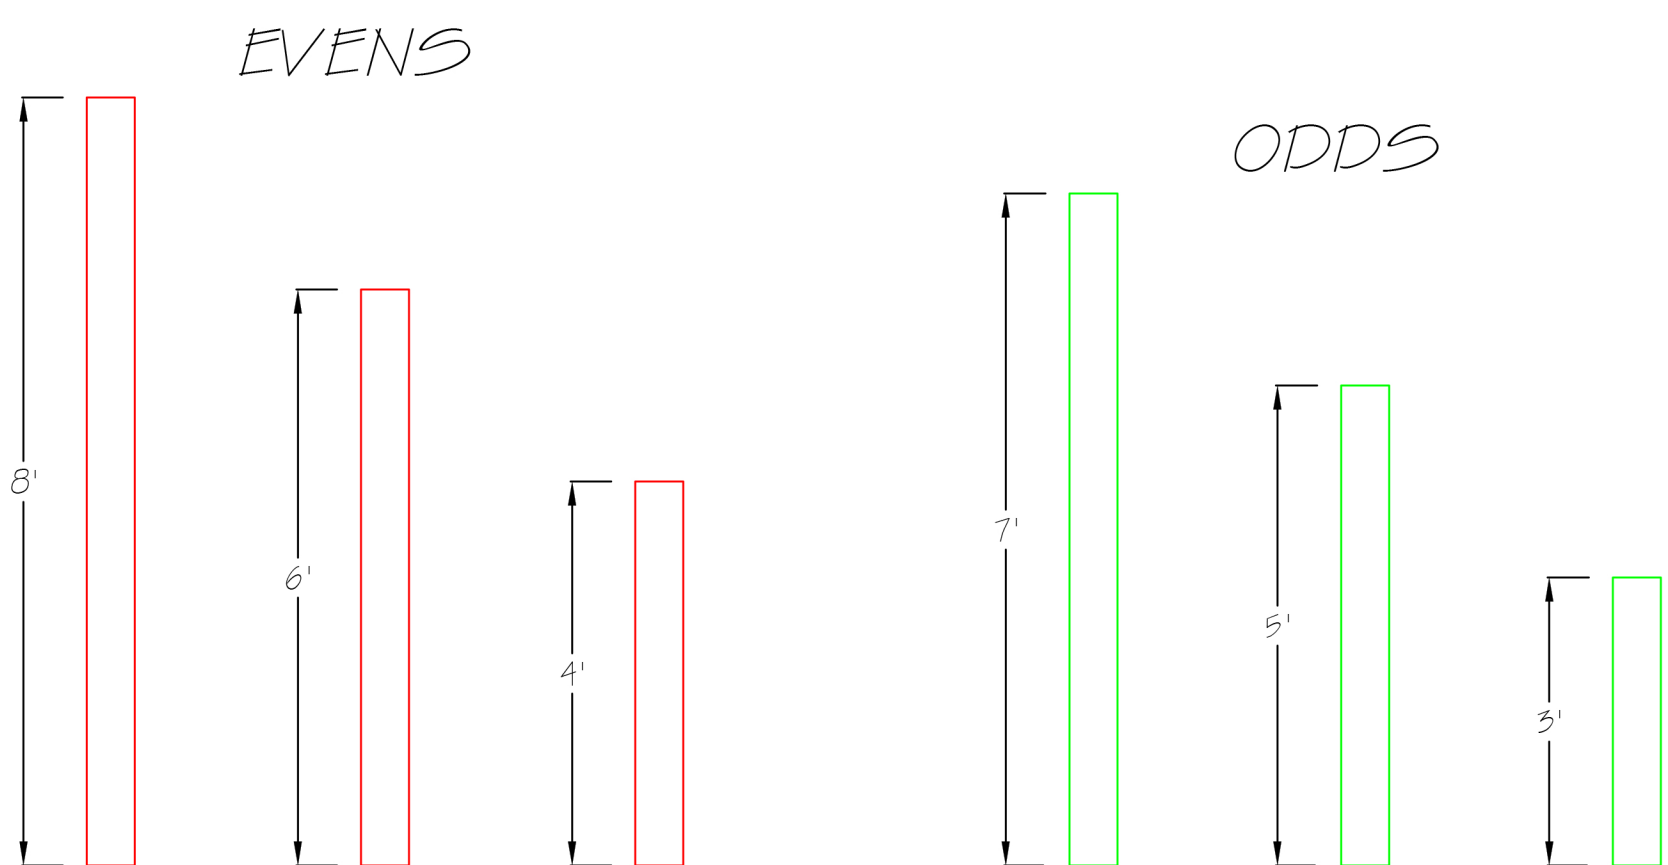

Plan View - Plank breakdown

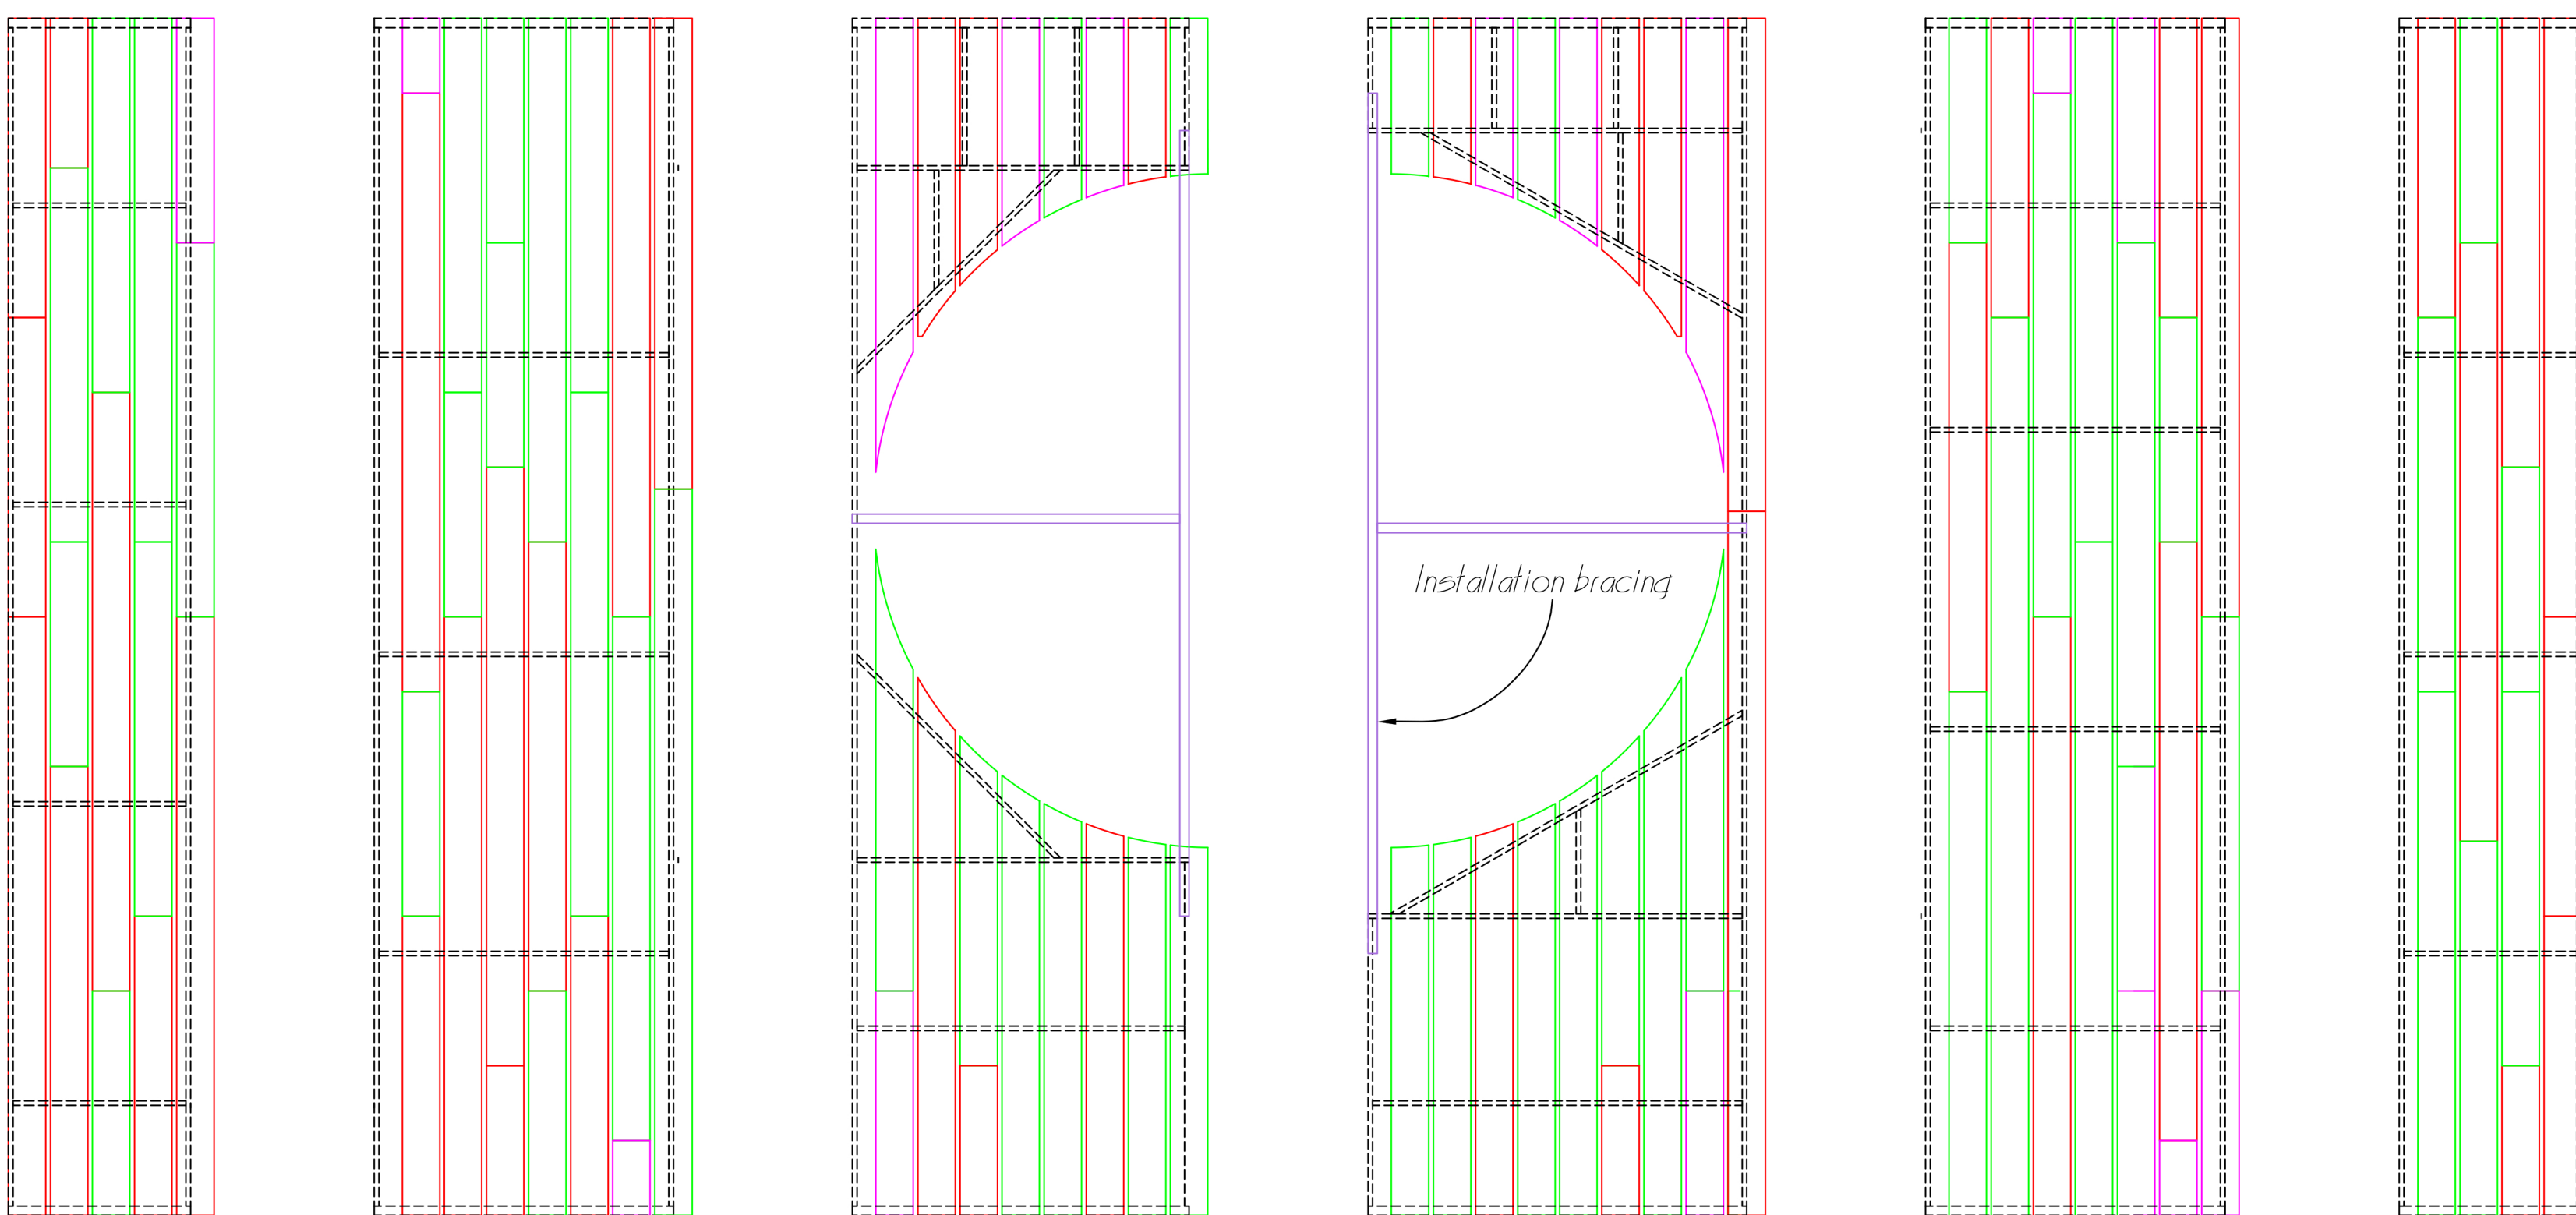

Rip 6" x 8" strips of luan to generate the planking. Cut a selection of even and odd measured lengths as shown below (evens are rendered in red, odds in green).

Measure the drawing at right with scale rule and install odds and evens accordingly. Fill with custom lengths (shown in pink).

Use installation bracing as shown and/or as needed to stabilize the fragile moon half openings prior to Set-In. The opening will support itself once the frames are screwed together.
